Paul Mitchell The School Birmingham

DISTANCE EDUCATION POLICY

The interaction with the Learning Leader is validated by measurable participation through clock hours. Milady CIMA, which is the program that the school will use for the distance education portion of the course, provides the school with a detailed report weekly as to the on-line assignments completed by the student and the exact time the student spent on that assignment. The program monitors if there is any inactivity during the time the student is logged into the system, if so, it will log the student out and time will not be given. Each student has their own unique login.

All tests, practical and final assessments that will be used for calculating a student's GPA must be given while the student is physically on campus. Students are evaluated on academic performance for each of the Distance Education modules. These evaluations are completed at the school facility and occur at least once monthly.

The student participates in learning activities while physically present at the school on a daily basis, as outlined according to their schedule on their enrollment agreement.

All transcripts or other documents, (official or unofficial), listing academic attainment received will identify the hours in each subject that they received thru the distance education component.

Prior to enrollment, students are provided with a disclaimer that academic achievement earned via distance education may not be accepted for reciprocity or eligible for licensure in other states. This disclaimer is signed prior to enrollment. This disclosure is also included in the school catalog.
